Aladdin ALL-IN 1 & 2

The Aladdin ALL-IN series is the result of innovation and feedback from the film and video production community. By using Aladdin products you are part of the ALL-IN journey that helped us create an ingenious LED light panel for you. Starting with an incredibly compact built-in dimmer on the back of the panel. The ALL-In series is lighter in weight, easier to handle and much more durable than previous generations of LED panel lights.

Choose either the 1x1 (ALL-IN 1) or 2x1 (ALL-IN 2) panel and give your footage the ultimate cinematographic flair. With the RGB panels in your bag you are prepared for almost every situation you will ever face in your production career. If you prefer to stick with a solid bi-color panel the new series provides a 1x1 and 2x1 variable white as well.

Flexible control features include the built-in dimmer, optional remote, optional DMX adapter, and the free App. We know not everything on this planet needs an app, but why not use this technology for easier and more accessible control? Work faster and more precise on set. The new app provides you all controls at your fingers. Dim and change the color of the panel you just installed on the ceiling across the room without even moving away from your spot. Built in special effects features strobe, fade, police and fire, television, fireworks, flicker, welding, and dissolve.

With motion control we are even going one step further. Trust your feelings and decide for yourself if you want to use it professionally or not. Motion control for the new panels is provided with the app and the optional remote control as well. Control dimming or color temperature with a tilt movement of your hand and get astonishing results with this new kind of workflow.
