

Aladdin U-LITE

The Aladdin U-LITE might be the smallest practical light in the world. It weighs only 12 grams and gives you 1.2W of colorful light via USB power. Shining bright in seven different colors. The Aladdin U-LITE is an astonishingly small practical light. On one end it has a male USB-A interface to plug it into a powering source of your choice, like a power bank or USB cable. On the other end it has six LEDs, which change between seven colors by tapping softly on the back of the U-LITE. The displayed colors are blue, dark blue, purple, red, yellow, lime green and green. Another great feature is the softbox accessory (not included). You can mount it directly onto the U-LITE to get a softer light that's more comfortable to look at. The Aladdin U-LITE can be hidden on your set to give a deliberately color-detail.
