The Ushio Halogen/Xenon ECO PLUS PAR lamps deliver brilliant, white light that is ideal for hospitality and retail environments.

ECO PLUS PAR lamps take traditional PAR lamps to a new level, providing up to 30% energy savings while delivering excellent color rendering properties (100 CRI) for very accurate color discrimination. Since they deliver more lumens per watt and are fully dimmable, they are the cost effective solution for accent and display lighting.

These lamps are available in wattages ranging from 38W to 70W in sizes PAR20, PAR30, Long Neck PAR30 and PAR38 in Flood beam patterns.

ECO PLUS PAR lamps are in compliance with the Energy Independence and Security Act of 2007.

FEATURES & BENEFITS
- Energy Saving
- Saves Up to 30% More Than Traditional PAR Lamps
- Silver Coated reflector for Improved Collection Efficiency
- Dimmable and Mercury Free
- Meets US Federal Minimum Efficiency Standard

APPLICATIONS
- Retail Store Display Lighting
- Downlights in Offices, Hotels & Retail Establishments
- Accent Lighting
- Track Lighting
- Indoor / Outdoor Flood Lighting

---

**WARNING:**

- **DANGER!** Halogen lamps operate at extremely high temperatures that can cause serious physical injuries and property damage.
- Only use Halogen lamps in Halogen approved fixtures.
- Do not use Halogen lamps in close proximity of paper, cloth or other combustible materials that can cause a fire hazard.
- Lamps are very fragile. Do not drop, crush, bend or shake them. Vibration or impact will cause filament breakage and short lamp life.
- Never touch the lamp when it is on, or soon after it has been turned off, as it is hot and may cause serious burns.
- Do not look directly at the operating lamp for any period of time; this may cause serious eye injury.
- Always turn off the electrical power before inserting, removing, or cleaning the lamp.
- Affix the lamp securely in the socket. Improper installations will cause electrical arcing, overheating and short life to lamp and socket. Replace lamp holders and sockets when necessary.
- Make sure lamps of specified wattage and voltage are only used in appropriately rated fixtures. Unspecified use will lead to short lamp life, breakage and overheating of fixture.
- Lamps should not be operated beyond the total rated voltage. Avoid the use of dimmers that may drive your lamp over its rated voltage.
- Use an external fuse when required.
- Do not allow one lamp to directly expose another. This may lead to overheating and shortened lamp life.

---

Not compliant with California Title 20.
Discontinued - For Reference Only

- This bulb meets US Federal Minimum Efficiency Standard
- Only for use in approved Halogen fixtures

Form No. S-ECOPAR/0921
